

Participant Consent Form: HCI – Mind Your Bubble Wireframes

This aim of this experiment is to find out users opinions on the 2 different design versions for our Mind Your Bubble App. This will take roughly 10 minutes.

Firstly, the format of the experiment will be explained, and the participant will be presented with one of the designs. They will be asked their opinion of it before being shown the second design. They will be asked their opinion of this design and then asked what their favourite is. The participant will be made aware that everything they say to do with the design will be written down and that they can drop out at any point if they want to.

All results will be kept private and no personal data will be stored about the participant. If they choose to drop out, then all data will be discarded.

If you have further questions please contact:

Catriona Murphy
