

Participant Consent Form: HCI – Mind Your Bubble App Prototype

The aim of this experiment is to find out users' opinions on our final prototype for the Mind Your Bubble App. This will take roughly 30 minutes.

Firstly, the format of the experiment will be explained. The user will then be asked to interact with our application on a mobile device. They will be asked to do different tasks on the application and, once they have done so, will be given a questionnaire to fill out about their experience. The participant will be made aware that everything they say to do with the design will be written down and that they can drop out at any point if they want to.

All results will be kept private and no personal data will be stored about the participant. If they choose to drop out, then all data will be discarded.

If you have further questions please contact:

Catriona Murphy
