

Participant Consent Form: HCI Project - Visualisations

The aim of this experiment is to find out your opinions on our four visualisation ideas for our project. This will take roughly 10 minutes.

Firstly, the format of the experiment will be explained, and the participant will be presented with one of the designs, with its capabilities explained. The participant will be asked their views on the data they perceive and will be made aware that everything they say to do with the design will be written down and that they can drop out at any point if they want to.

All results will be kept private and no personal data will be stored about the participant. If they choose to drop out, then all data will be discarded.

If you have further questions please contact:

Catriona Murphy

School of Computing Science
